

Supplementary material. Questionnaire of assessing preoperative nutritional status and postoperative outcomes

Patient's ID		
Section I: Demographic Data		
Age in months		
Sex	Male	Female
Anatomical group		
Specific disease		
Type of surgery		
Associated comorbidities		
Difficulty in breast feeding	Yes	No
Problem with weaning	Yes	No
Previous nutritional counseling	Yes	No
Section II: Nutritional Assessment		
	Upon admission	Upon discharge
STRONG _{ids} score		
SGNA score		
Weight (Kg)		
z-score		
Length (cm)		
z-score		
Weight for Length z-score		
Mid arm circumference (cm)		
z-score		
Triceps skin fold (mm)		
z-score		
Mid arm muscle circumference (cm)		
Percentile		
Albumin (gm/dl)		
Hemoglobin (gm/dl)		
Section III: Post-operative Clinical Out comes		
Grade of complication		
Total hospital stay		

SGNA, subjective global nutritional assessment.
