

Supplementary Fig. 2. The comparisons of the plasma concentrations of matrix metalloproteinase 8 (MMP8) between the normotension (Normo) and preeclampsia (PE) groups in the maternal (A) and cord bloods (B). Horizontal lines on violin plots indicate medians with interquartile ranges. * $P < 0.05$ and ** $P < 0.01$, compared between the 2 groups by Mann-Whitney U test.
